Retail Operations Review Policy

Effective date: 2025-01-01. Applies only to the synthetic demo dataset.

Finance review: a discount_rate of 0.30 or greater requires review.

Margin review: a gross_margin_rate below 0.10 requires senior finance review.

Operations escalation: fulfillment_days of 10 or greater requires escalation.

A blank fulfillment_days value is unknown and must not be treated as meeting the threshold.

A returned transaction does not by itself require escalation.

status=review means at least one rule above matched; it is not a finding of fraud or misconduct.

gross_margin_rate is gross_profit divided by revenue when revenue is greater than zero.

Reported patterns are observations. The data does not establish why a result occurred.
